Non-GAAP Financial Measures

To supplement Yodlee's financial information presented in accordance with generally accepted accounting principles in the United States, or GAAP, Yodlee considers certain financial measures that are not prepared in accordance with GAAP, including non-GAAP operating income (loss), non-GAAP net income (loss) and adjusted EBITDA.

Yodlee defines non-GAAP operating income (loss) as operating income (loss) before provision for stock-based compensation expense, merger-related expenses, and non-routine legal expense, Yodlee defines non-GAAP net income (loss) as net income (loss) before provision for stock-based compensation expense, merger-related expenses, and non-routine legal expense, and Yodlee defines adjusted EBITDA as net income (loss) before provision for (benefit from) income taxes; other (income) expense, net; depreciation and amortization; stock-based compensation expense, merger-related expenses, and non-routine legal expense.

Yodlee believes that non-GAAP operating income (loss), non-GAAP net income (loss) and adjusted EBITDA, each a non-GAAP financial measure, provide investors and other users of its financial information consistency and comparability with its past financial performance and facilitates period-to-period comparisons of operations. Yodlee believes that these non-GAAP measures are useful in evaluating its operating performance compared to that of other companies in its industry, as these metrics generally eliminate the effects of certain items that may vary for different companies for reasons unrelated to overall operating performance. Yodlee uses non-GAAP operating income (loss), non-GAAP net income (loss) and adjusted EBITDA in conjunction with traditional GAAP measures as part of its overall assessment of its performance, including the preparation of its annual operating budget and quarterly forecasts, to evaluate the effectiveness of its business strategies and to communicate with its board of directors concerning its financial performance.

These non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. These non-GAAP financial measures are not based on any standardized methodology prescribed by GAAP and are not necessarily comparable to similarly-titled measures presented by other companies.

Yodlee has not provided a reconciliation of adjusted non-GAAP operating income (loss) to GAAP operating income (loss), non-GAAP net income (loss) to GAAP net income (loss) or non-GAAP net income (loss) per share to GAAP net income (loss) per share for future periods because the Company does not provide guidance for stock-based compensation, which is the reconciling item between those non-GAAP and GAAP measures. As stock-based compensation impacts GAAP operating income (loss), net income (loss) and net income (loss) per share and is out of the Company's control and/or cannot be reasonably predicted, the Company is unable to provide such guidance. Accordingly, a reconciliation to GAAP operating income (loss), net income (loss) and net income (loss) per share is not available without unreasonable effort.
